

TK Hockey 2019 Workbook
Embracing the Past. Shaping the Future.

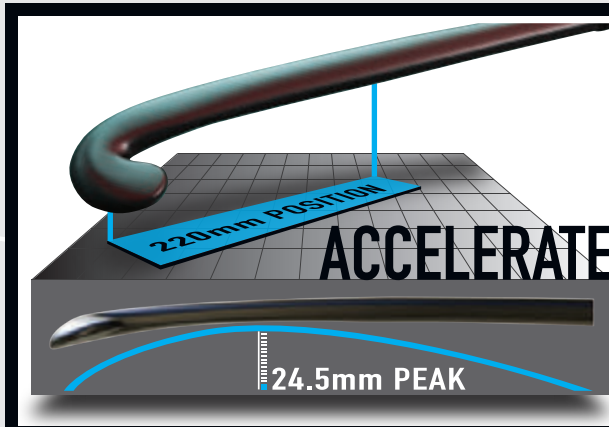

BOW MOULDS

GRAVITATE XX LATE BOW

Our most aggressive and extreme placement of the bow offers the perfect shape for the modern player looking to perfect 3D skills. A narrower shaft profile and head shape offers the maximum assistance in aggressive playability.

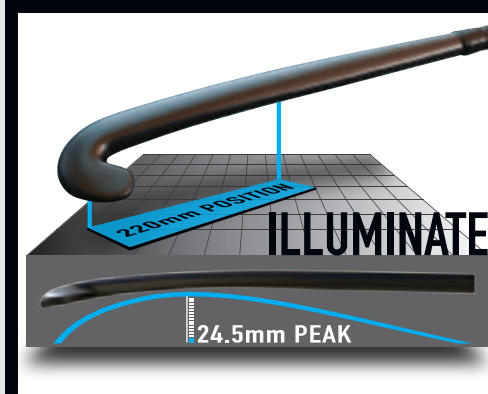

Bow Peak: 25mm
Bow Position: 200mm

ACCELERATE X LATE BOW

A sweeping profile with an extreme late placement of the bow offers high level assistance to dribbling, aerial passing skills and drag flicking.

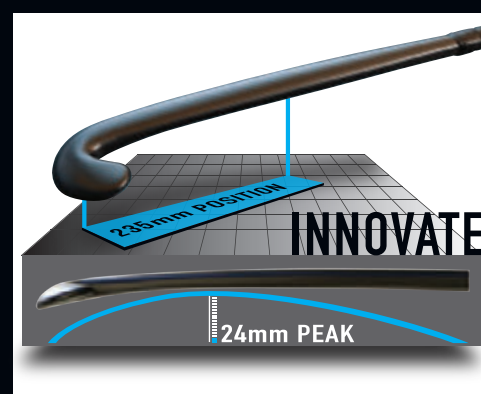

Bow Peak: 24.5mm
Bow Position: 220mm

ILLUMINATE CHANNEL X LATE BOW

An extreme late placement of the bow is combined with a concave groove placed in the lower third of the shaft to assist pick up and increase slingshot momentum when flicking.

Bow Peak: 24.5mm
Bow Position: 220mm

INNOVATE LATE BOW

The Innovate profile is designed to offer all round assistance to a 360-degree skillset, allowing the player to perform all aspects of game play well.

Bow Peak: 24mm
Bow Position: 235mm

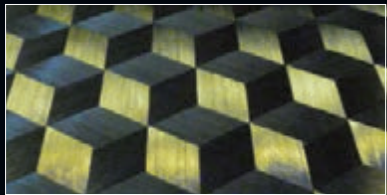

ACTIVATE MID BOW

A balanced mid bow placement for the player who prefers a more traditional profile.

Bow Peak: 22mm
Bow Position: 300mm

TECHNOLOGY

TK continues to push the boundaries of what's possible. Our 2019 collection is the culmination of years of development, it offers something new and something unique. We strive to give your game that performance advantage, the something extra we all seek.

BALLISTIX

A high performance triaxial weave resulting in a significant increase in torsional rigidity to offer maximum power output and ultralight-weight. The Ballistix triaxial weave enables better manoeuvrability during the manufacturing process to offer greater performance and distribution of the materials in key areas.

GRAPHENE MATRIX

A matrix system which includes a conventional epoxy resin along with a revolutionary material GRAPHENE, which provides high impact, flexural and tensile strength.

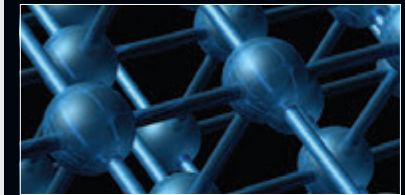

EPOFLEX

A modified rubber technology that enhances the bonding of the rubber with epoxy molecules to create a material that provides superior shock absorption.

CARBOTRAX

A special triaxial weave featuring fabric woven at 0, +60 and -60 offers increased rigidity and structural strength over more traditional biaxial materials. The triaxial weave results in increased torsional rigidity and lighter weight to produce high performance sticks that offer excellent power output and feel.

NANO TECHNOLOGY

A construction which enhances the mechanical strength of the stick to provide maximum stiffness and potential power output.

INTEGRATED DAMPENING SYSTEM

Piezoelectric Fibres convert kinetic energy into electrical signals and finally heat energy helping dissipate ball play vibrations.

REACTIVE LIQUID POLYMER

A special polymeric additive that improves the strength, durability and performance of the stick.

ADVANCE MATRIX CONSTRUCTION

A careful blend of carbon, aramid and glassfibre to create an enhanced construction that results in greater potential output and increased feel.

TRACTION CONTROL

A new anti-slip material that offers supreme touch and feel on the stick. The material enhances control and first touch, behaving brilliantly in wet conditions.

PUSHING
THE
BOUNDARIES
ADVANCING
THE GAME

TOTAL ONE +

TECHNOLOGY. RE-DEFINED.
Our Total One Plus series pushes the boundaries of technology. We use next generation materials to create a range of sticks that offer something truly extraordinary.

TOTAL ONE

PERFORMANCE. RE-DEFINED.
Our Total One series features the leading materials that are combined with the best production techniques to create sticks that redefine what's possible and produce the very best performance.

TOTAL TWO

INNOVATION. RE-DEFINED.
Our Total Two series features high performance materials and innovative construction methods to produce sticks that provide a range of sticks to suit all players.

TOTAL THREE

DESIGN. RE-DEFINED.
Taking inspiration from our Total One and Total Two series, the Total Three series is designed for players who are looking for high performance sticks at affordable prices.

TOTAL FOUR

The Total Four series is designed for the aspiring player who is new to the game and is looking for the perfect equipment to start them on their hockey journey.

TOTALONE + PLUS

With the Total One Plus series being on top of the stick selection, a brand new composition and shape is introduced, giving the player a unique touch and feel, while still being strong and durable.

Constructed with a special arrangement of carbon layers and selective use of reinforcement on intensely strained areas, the composition offers maximum power and stiffness, while being super light weight at the same time.

Finished off by a rubberised layer of 3K carbon, that creates an unprecedented feel on the ball.

TOTALONE +

A RESET IN HOCKEY

The all new Total One Plus Series is truly something from the future. Next generation materials and construction are combined with a brand new shape to bring a whole new meaning to the phrase 'Extreme Late Bow'. These sticks are designed for the modern player and offer maximum assistance in aggressive playability.

TRI COATED SURFACE

The new tri coated surface is a rubberised final carbon layer, giving the hook of the stick an extra surface of a more abrasive texture and providing additional touch and feel to the player as well as a more moderate rebound, when receiving the ball

TOTALONE

ONE FOR THE TROUBLE...

The Total One range is a premium mainstay in the TK portfolio. Chosen by some of the top hockey players in the world, it offers a small selection of top-notch hockey sticks, crafted to enhance a professional players performance to the max. The high percentage of carbon and special arrangement of layers create a very light-weight, yet strong product that enables the player to perform at their maximum.

TOTALTWO

TWO TO GET READY...

The 2019 Total Two range has some great updates in store, sitting one step below the Total One range. From 100% carbon 2.1 to 30% carbon 2.5 the series offers a variety of styles, serving every player's needs. The updated, more subtle designs focus on the elephants as the key symbol, while the new tri coated surface offers improved touch and feel.

TOTALTHREE

THREE FOR THE SHOW...

The Total Three range offers the perfect selection of allround sticks for every players needs.

With the majority of the range having a rather low amount of carbon, the sticks offer a soft touch and feel to a player, as well as high endurance.

The updated design and colourways provide the opportunity to choose from bright to more subtle versions, all marked with the iconic elephants.

BAGS

Wherever your destination we believe your bag shouldn't just carry your hockey gear, it should protect it and look good doing so. Our bags are designed from a players' perspective to ensure that they work exactly as you need them, whether you're heading to training or heading to a cup final, we have a range of bags to accommodate everything you need.

TK bags are equipped with a range of features to make your life easy and ensure you can carry all your gear in complete comfort.

Our progressive G-CELL cushioning and AIR VENT mesh cooling system will help to dramatically reduce load discomfort while closed cell foam zones deliver impact resistance for delicate items.
